

Disneyland[®]

Resort in California

Information on Show Lighting Effects

As part of our show, specialty lighting and other visual effects are used extensively throughout the *Disneyland*[®] Resort. Our lighting effects run the gamut from exterior building accents (e.g., strobe-like effects incorporated in outdoor signs), to dance club lighting (mirror balls, flashing and/or spinning dance floor lights, among others), and attraction and show effects (simulated lightning, explosions, and/or chaser lights, etc.). These effects may include strobe lights and other pulsating lighting effects.

In addition, our entertainment, events and performances are continuously changing, and their show environments can vary throughout the day, making it impossible to list all possible lighting combinations. Therefore we are unable to give a definitive listing of strobe or lighting effects that may cause you concern.

Should you or any member of your party have a photosensitivity or seizure disorder, we recommend that you check with your personal physician for specific instructions on how best to manage your visit.
